propriations to the Department of Public Schools and Soldiers' Orphans were materially reduced; the salaries of the Judges of the Supreme Court were diminished fifteen hundred dollars each Northern Home for Friendless Children gets five thousand dollars less than was anticipated; the Schools of Design loss two thousand dollars; and been secured. Along Pithole Creek, between the appropriations for the Polytechnic College and also for all the " local charitles" in the State, are stricken out onlirely. The bill now calls for an appropriation of about \$3,000,000.

How To Anventusz. In discussing a bill be

run une paper a Orief advertisement, day at \$10, renches this immense constituency—is brought by the mail to their very doors; thrust—so to speak—under their noses—and all at the rate of the thousandts part of one cent for each reader. Supplies, now, you undertake to reach these readers by hands, you undertake to reach these readers by hands in the rate of each property of the rate of the same and a million of two-cent samps, which will cost about \$2,000 for the envelopes and \$20,000 for the stamps, in all, \$22,000; mailing and so on would bring this up to about \$25,000. The same result is atteinable through the Tribuse for less than the two-thou samet's part of this arm; for \$10 you get all the pathicity that your \$25,000 would scarcely secure, as above explained."

Markun's Pictume.—On a fine spring day, law weeks ago, Mather went down the Creek, and took a landscape view of some oil fatme. dered by a party to a great law sult soon to be tried, and le to be introduced as evidence. Mather, placed his instrument on Look-out, or Lover's Leep and the viewembraces the town of Pleasur; Beaulaghoff and Juster lween. The patches of spon and the swelling brook tides show that the sea son's change has come; the trees are bare, the son a comment of the hillides, and the smotre cerls from engine beause. Mether has required an excisive distinction in initial out-door pictures, and made to have a great many orders for old views to by gene they. He is equally successful in methy, photographs, and has leady proceed derivate by fiverest float and Pooling Apparents. In secure move one and grace to sitters. ton derricks dot the hilldidg and the se He else selere pietures, and his re worth visiting.

Production—Development—Stock or (ii) in the Off Region—Number of New Wells Drilling—Iron Tankage—Exports—The Price of Oil, Shipments, des, des

The production has undergone a slight increase in three or four districts, but in most of the others there has been a falling off which has largely overcome the increase. The decrease om this time last mouth is seven hundred and fifty barrels. It has taken place on the Benning-hoff, Woods, W. McClintock, and Foster Farms, on Church Run, and in the Allegheny River district. The Tidioute and Lower Cherry Run districts, and Bennehoff Run, show a slight falling off. The decrease has been occasioned partly by the oil becoming exhausted in the vicinity of the wells, and partly by accidents of various kind to the working apparatus of the wells. While rom these causes the decrease has been going on the effort to increase the production by the application of the different inventions for that purpose, has become enfeabled by the attention of the producers being drawn toward new territory; and in comparison with other menths, the aggregate increase by this means has been light Besides this, the number of new wells struct during the month was about twenty, which was much smaller than during any previous one is half a year Of this number, not more than ten are now producing oil in paying quantities About five are producing from ten to fifteen barrels each per day, and but three or four have : production of fifty barrels each. The increas from the completion of these wells has not reached over two thousand barrels during the entire month, and that from the resuscitation and cleaning out of old wells has scarcely amounted to twenty-five hundred barrels. The weather during the month has been more favorable, and several of the small-producing wells on which operations were suspended during the winter, are ow being pamped.

Parker's Lunding, on the Allegheny River, is nearly nine thousand burrels per day. This pro duction is pretty well distributed over about sixty farms and districts. The largest producing district is that of Unper Cherry Rose A ver large proportion of the wells are pumped, and himost of them the oil producing sand rocks are found at from seven to nine hundred feet below the surface. On Upper Cherry Run, at Scrut Grass on the Alleghens River, on Lower Cherry Run and in one or two other districts there are flowing wells, and in all about twenty. Of these there are two on Upper Cherry Run, each of which is producing about three hundred and forty barrels per day, but the most of the others dications it seems that the minimum production for at least the first half of this year has already been reached, or if it has not, that it will be dur ing the coming month : for there are several new completed within the next fifteen days, and from this time the weather will fivor the continuous working of old wells. But while an increase may be expected, it is altogether probable that it will not be large. The following tible shows the rotal production on the 7th of each month slace No

vember last:

THE DEVELOPMENT AND THE TERM FORY. The return of warm weather and the somewh levelonment to be proscented with more energy and during the past mouth the number of ner ells has been largely mereased. The same causes have produced unustal activity among dealers in territory, and probably a larger amount has changed hands within the past month than during any three months in the past year. The price has considerably approximed in nearly all parts of the region, but this is more particularly the case in the vicinity of Upper Cherry Run and Pleasantville, and between these places the greater part of the territory has been secured. Between Upper Cherry Run and Plasentville, there is a truet of territory from one half to two miles wide and five to six in length, on which producing wells have been found in different places, and it is the general opinion that the oil bearing sand rock which has been found at Pleasoutville is a continuation of that found on Upper Cherry Run. This tract contains about twelve square infles, a fair proportion of which is table land. Cherry Run, several branches of West Pithole Creek and a tributary of East Oil Creek, called Cherry Creek, have their sources in different parts of it. There is some doubt as to whether oil will be obtained in paying quantities on all of this tract. Along Upper Cherry Run paying wells have been found fully one mile

apart, and on West Pithole Creek the distance between the two largest producing wells is nearly two miles. This territory affords ample room for extensive operations, and the development of it has stready been commenced or large scale, and it is probable that at the present rate the greater part of he will be tested, and the course of the oil bearing sand rock indicated within the next three, or at the furthest, the next six months. In the immediate vicinity of Picus antville five new wells have been started and Pleasuntville and the National well, there are seven new wells being drilled, and several more are to be started. On Upper Cherry Run abou twenty-five new wellcare going down Of these, robubly not more than ten will be completed during the next thirty days. The territory ad-

the north have also been leased, and operation ave been commensed on two of them, In the Allegheny River district, below Oil City. four or five new wells have been started, and in several places in this district the indications are

joining the producing district on the south has

been leased, and new wells will be started in

that large producing territory will be found On Church Run the development during the past onth has progressed slowly, and, on the whole it has been more unsatisfactory thun that of the revious month. On the southern border of the able land to the cast of the Run, the wells that have been completed have produced but little oil, and it now seems that the most productive sand rock lies to the north of these wells -In the vicinity of Shaffer Rus, no new wells have been tested during the past month, and the extent of the oil bearing sand rock at this place, still remains in doubt. On the Reno Land Com-

pany's property on Shaffer Run, a number of leases have been given and this territory will be tested within the next three months, During the month a new wer was tested on Upper Cherry Tree Run, about fou, miles south of Titusville and two miles west of vi) Creek.

but as yet, has produced but little oil. On the Kaussett Oil Company's property at From Petroleum Centre, eleven new wells have started. About ten or afteen lesses have been given and operations with the commences we make af them within two weeks. On the Woods Farm there are now ten new wellnin different stages of these are new ten new wellnin different stages of these tensors of those are newly compleprogramion. Some of these are nearly comple-ted, and the indistricts are that several of them will produce language. On the Stores the Poynty has been reduced to one it the old on all the wells that started after April Let, and during the next thirty or staty days, about

if ten or fifteen new wells will be commenced. At Tidiquie there are nine wells being drilled on the south side of the River, and all of them are located on the Economite property. The well started last fall, to the south and southeastward of the above property have since been completed, and abandoned. On the west side of the River, new territory has been found on the Jayson farm, situated between the headwaters of Gordon an

Altogether about two hundred wells are being drilled in the region. About twenty-five are le cated on "wild" territory, and about sixty of new territory. From present indications it is probable that the number of drilling wells will be increased by the close of the coming month to two hundred and fifty.

STOCK OF OIL IN THE OIL REGION

alightly increased during the past month, and it w seaches five bundred and fifty-nine thousand thousand barrels. This stock includes ten thou and barrels that is held in wooden storage tanks at Titusville, Oleopolis, Henry's Bend, and Tid nte, about one thousand barrels in bulk barge in the Atlegheny River, and the amounts on th hands of producers and in iron tankage. The mount on the bands of producers is somewhat larger than at this time last month, on account (lining market during the past ten days and the very light shipments of the past week, and it is set down at seven days' production. During he month about seventy-five thousand barrels were shipped by water to Pittsburgh. Over one half of the total stock is held along the Alle gheny River in an easily accessible situation for fiver shipment, and the greater part of the remainder is stored along Oil Urcek, where, for the greater part of the year, it can only be moved by railroid. Probably, about fifty thousand barrels of the total stock is thick oil, and nearly all that in from tinkage is under 45 degrees gravity. The annexed table shows the total stock and the

THE THON TANKAGE.						

The capacity of iron tankage has been enlarged during the past month by the completion of nearly one hundred thousand barrels, or fully one tenth of the entire capacity. The total cupacity is now nearly one million barrels, of forty three gallous each. There is now in course of construction along Oil Creek, tankage to the capacity of seventy-five thousand barrels, and along Allegheny River there is contracted for and being constructed, a capacity of at least seventyfive thousand barrels, making in the aggregate this will be erected, of two hundred and filty thousand barrels. The greater part of this unhage will be completed by the first of June tiest

Impeachment Items.

The trial will be resumed to-day, and the Pres ident's defense will be opened by Judge Curtis The belief generally entertained is that not great amount of testimony will be offered, and the impression prevails that the trial will be concluded by the 20th of April. General Rousseau is the only witness whose evidence cannot b heard within the next three or four days, and the Senate will not be likely to walt for him, he being in Oregon. As to the rest, a correspondent

writes as follows:

"The argument will, therefore, begin early next week, and probably be concluded the same yeek. Two counsel on each side will argue the case. Judge Chris will open the case for the defense on Thursday. Mr Ernets will conduct the translation in chief of the wiscusses. Mr. Binghain will cross examine for the Managers. Mr Everts and Mr. Stanberry will chose for the defense, and Mr. Wilson and Mr. Singhain will close for the prosecution, Mr. Binghain will close for the prosecution and the singhain making the closing argument in the case. It is altogether probable that the Sensite will spined two or three days in debate on making up their verdict. The rule limits them to fficten minute spinedses on the final issue, except by manimous consent, which, if availed of by each Senator, would consume fourteen hours, or equal to about three days ordinary sessions. The time there fore seems the earliest possible date at which a conclusion can be reached, and does not include any margin for further possable delings."

Correspondents and others in the interest of

Correspondents and others in the interest of the President do not heattate to telegraph and write that eix Republicans whi vote for seguitial Even if this were true, it would not save him for with a infl Senate seven is necessary. But there is not a word of truth in the report. Says mother correspondent

"Two Republicans in the Senaté are known to have talked against impendament, when it was before the House, and that fact has led the Dem-orate to suppose that they believe Mr. Johnson innocent It affords no Indication of their vote. t grows more and more evident that the Pres lent will be convicted, if at all, for his attempte through of Shadan and the conviction of the convict cmovat of Stanton and the appoint near of La-enzo Thomas, and there is nothing yet which ives the slightest indication that he will not be aund guilty."

understood that the President's counse understood that the President's counse Ill take the ground that the chirgs of violation the leaure of Office Act in Mr. Stanton's case as failed, imaginch as its provisions were no na failed, imagnuch as its provisions were not mended to apply to members of Mr. Lincoln's Jabinet holding office on sufferance under Presi-

Cambret holding office on sufferance under Presi-dent Johnson.

The speeches of prominent Republican Sens-tors will be produced in substantiation of this view, and also Mr. Stanton's own statements to that effect in Cabinet meetings. It is believed that the ease will open on Thurs my, with a motion to quash the papecedings, on the ground that the evidence talks to substantiate the impeachment charges of high crimes and uisdemeanors.

misdemeanors.
Among the resorved evidence of the Impeceliment Managers is a batch of testimony to substantiace a second alleged violation of the Tenare-of-Office bill by the President, which, in case of necessity, may form the basis of an additional charge against blm.
